Roblox Hiring Team
970 Park Pl
San Mateo, CA 94403

Dear Roblox Hiring Team,

I was thrilled to see the Early Career Software Engineer opening. The mission to build the future of human interaction and empower a global community of creators is incredibly inspiring, and it's a vision I would be excited to contribute to.

I have a strong foundation in software engineering through my projects, where I've used languages like Python and C++ to build full-stack applications. The opportunity to work on large-scale distributed systems and collaborate with teams across design, product, and infrastructure is a perfect match for my desire to learn and grow.

I am especially drawn to the chance to tackle unique challenges at scale. For instance, in a recent project, I developed a tool that involved designing the user-facing features and the back-end logic, giving me hands-on experience with the full development lifecycle you described.

I am a quick learner who thrives in dynamic environments, and I'm eager to be mentored by top engineers while contributing to impactful projects. I would welcome the opportunity to discuss how I can help the team at Roblox.

Best regards,

Shree Gopalakrishnan
